

CPSI Managed Services: Monitor Your Entire Power Infrastructure from a Single Screen Dashboard

MANAGED SERVICES

When it comes to data center power infrastructure, the challenges and demands are both constant and constantly evolving. Facility managers have enough to handle already, but must:

- Reduce costs while meeting growing system demands
- Maintain system performance and scalability
- Maintain effective utilization of resources
- Limit energy use

The CPSI Managed Service Platform provides a single-screen dashboard of your entire critical power system: everything from utility power and generators to server racks.

- Customized monitoring plans and reporting to suit any system or business need, without increasing current maintenance budgets
- Unprecedented visibility and management of environmental, power consumption and cooling
- IP-based systems can monitor multiple facilities, anywhere, anytime
- Scalable integration of an extensive variety of equipment into a holistic view of your environments

PEACE OF MIND

The Managed Services Platform allows data center managers to identify problems before they escalate. Combined with CPSI's 24/7 predictive maintenance system, critical power issues are resolved quickly and before downtime occurs.

CPSI brings its entire partner ecosystem to ensure real-time, accurate monitoring across your entire critical power infrastructure.

Environet and BACS

- Provides a fully scalable system that provides a single, highly customizable point-of-access for all system management functions
- Battery Analysis and Conditioning System (BACS) extends battery life by 50% plus, simplifies maintenance and dramatically reduces costs. Extended warranties available

FAQ

Can CPSI monitor my unique power systems infrastructure?

CPSI can work with nearly any power system and equipment. Even if it doesn't have a communications protocol, CPSI's engineering team has the expertise to connect all of your critical equipment to our easily scalable monitoring system.

Will this require downtime to install?

Downtime is rarely required. CPSI can implement the installation process into regularly scheduled maintenance windows.

We need a new installation, but what if we don't have an approved capital expenditure budget?

CPSI can bundle equipment and services into a monthly operating expense.
